

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for Plott Acres PWS 1520062

Our system failed to collect every required coliform sample. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we did (are doing) to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During MAY 2021, APR 2021, MAR 2021, we did not monitor or test for coliform bacteria and therefore cannot be sure of the quality of your drinking water during that time.

What should I do?

There is nothing you need to do at this time. You may continue to drink the water. If a situation arises where the water is no longer safe to drink, we are required to notify you within 24 hours.

What is being done? [Describe corrective action, for example: We collected every required coliform sample in [month and year] and are no longer in violation.]

In order to return to compliance our system had to collect a monthly distribution sample, take it to a lab to be analyzed and send the results to TCEQ and that sample was collected on (date) 06/16/2021.
